Debossing - (Generally for [leather type albums like "The Savona"](#)) -

*Be sure to spell out specifically how you would like any names rendered.

Notes/Comments -

Picture List

List Format: The list **must be typed**. We will not accept pictures or written lists. You can find the file names on your Online Gallery or you'll see them on your device once you download them.

The numbers look like 303_JON4567.jpg, we need the full name. **If your list is not formatted correctly we will request you to redo it, otherwise we cannot move forward.**

Specific Picture Order?: We prefer to put the pictures in chronological/subject order ourselves but if you have a specific order OR if there's a certain grouping of family pictures please indicate in your list or above in the note section

Edits: If there are any minor edits you would want to request, please indicate on your list. We can't guarantee we can make all of these edits depending on how involved they are. What's possible varies picture to picture.

Your Picture List- Fine Art/MacDaddy Albums hold 100 pictures. We'll work down from there (We try to keep every picture in your album.) Do not number them, just paste them.
